RE: The TacDogs Program and 3-Day Seminar.

THE TACDOGS PROGRAM:

TacDogs is the only K-9 training program in the country that has a step-by-step program. The 10 disciplines of the program are specific for the greenest of handlers and/or K9's to the most experienced. This program was developed from real life experiences, not theory. This program has proven to enhance K-9 deployment capabilities, overall team safety, and reduced liability.

The program was developed as a seminar in 2009 by Brett Titus, a K-9 handler that works for a full-time SWAT team in a major metropolitan city. Brett has 20+ years training dogs professionally, and has worked as a police K-9 handler since 1999. Brett has lectured and trained thousands of K-9 teams across the country, both law enforcement and military using these program disciplines.

The 3-Day TacDogs seminar: Each day is structured based on the dog teams attending.

Day 1-

A classroom lecture and presentation over the TacDogs Program. After concluding the lecture/presentation will be dog evaluations of attending dog teams, then practical field training of foundational and/or communication obedience. **Day 1 is important to optimize Day 2 and/or 3 for dog teams and observers. If only one day can be attended, it is advised that Day 1 is selected.*

Day 2-

All building and/or area searches that will incorporate tactics, team movement and searching (with and without the dog), and specific exercises to enhance the dog's ability to search, find and apprehend, as applicable, while under control of the handler.

Day 3-

Range day. Shooting exercises with and without the dog. Obedience exercises that promote the dog being neutral to gunfire and not a hindrance to the handler or other cover officers, or team during a gun fight.
