

# ADVANCED LAW ENFORCEMENT SNIPER COURSE

NOVEMBER 7-9, 2018 | MARICOPA, ARIZONA

## COURSE DESCRIPTION

The upcoming Law Enforcement Advanced Sniper Course will be focused on melding the basics with more advanced skills throughout the 3 days of training. The beauty lies in the basics, and the best shooters spend the time learning the trade before they learn the tricks. We'll focus on establishing a solid foundation of the fundamentals of marksmanship using purpose-built shooting drills meant to diagnose problems, and create an environment that fosters discovery learning on the part of the student. We'll cover the latest in external ballistics and the current state of the art as it pertains to ballistic engines and how we're able to predict exactly where the bullet will be in time and space. Once data has been proven and gathered, we'll move on to focusing on the finer points of marksmanship by testing your ability to apply these fundamentals from compromised shooting positions. You'll receive one-on-one coaching to squeeze every bit of support from your body and your gear. You'll come away from this course with a no-doubt understanding of your capabilities and limitations, as well as have professional feedback on your performance and how to improve.

- ⊕ Fundamentals of Marksmanship
- ⊕ Rifle Maintenance
- ⊕ Internal, External and Terminal Ballistics
- ⊕ Ballistic Computer Programs
- ⊕ Unconventional and Tripod Supported Positions
- ⊕ Obstacle Clearance Techniques
- ⊕ Surgical Shooting Skills
- ⊕ Known and Unknown Distance  
(Target Engagements from 70-850 yards)
- ⊕ Individual Equipment Set-up and Management
